

INPOOL

FIXED
POOL
LIFT

INPOOL is the lift that meets the needs of removing architectural barriers in aquatic environments, from the private pool, to the pool of SPAs, luxury hotels, as well as public swimming pools. The ease of installation, the reduced overall dimensions, but at the same time the safety and the technical specifications of the material, make INPOOL the intelligent and responsible choice, given the minimal impact on the environment and its attractive design. INPOOL installed at a private swimming pool, is an excellent solution for pool access in complete autonomy. In the tradition of DiGi Project swimming pool lifts, INPOOL is also a medical device which complies with the current regulations, perfectly combining safety and practicality.

CERTIFICATIONS AND PATENT

Regulation EU 2017/745 Medical Devices – class 1 - DM 2563037/R
 Directive 2006/42/EC - Machinery Directive
 Directive 2004/108/EC - EMC Electromagnetic Compatibility

TECHNICAL DETAILS

Maximum capacity: 140 kg
 Maximum travel: 1340 mm
 Depth of seat inside the water: 830 mm
 Time of lowering - lifting with weight into water: 45 sec
 Weight of the lift: 60 kg
 Battery: 24 V

OPTIONAL

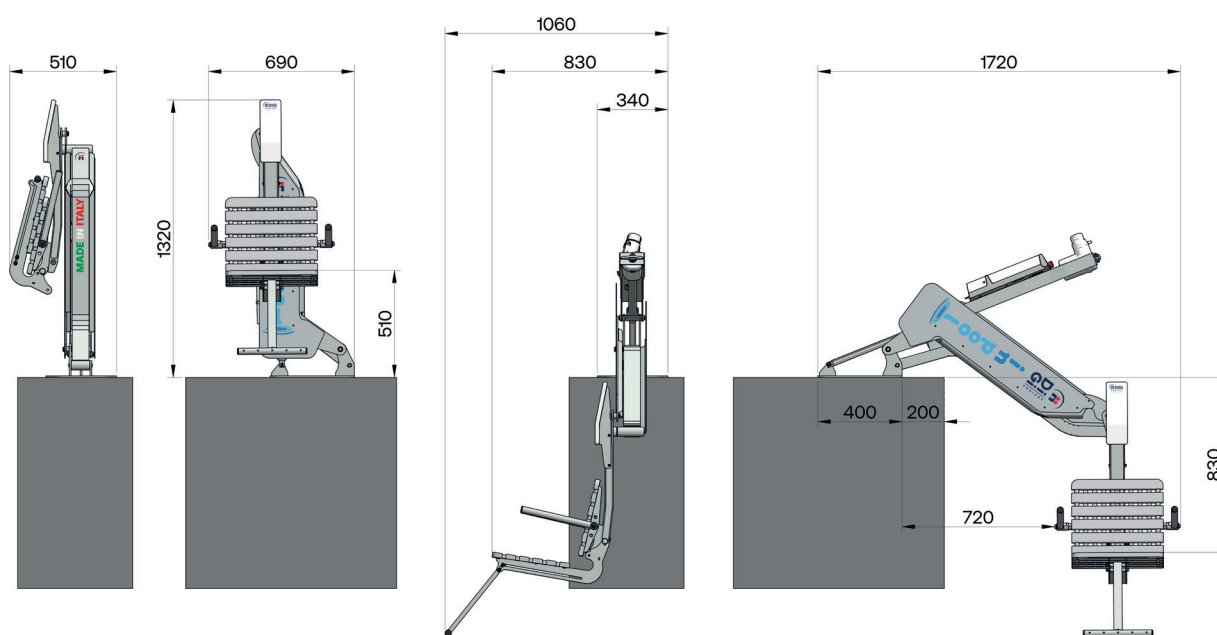

4-point safety belt
 Protective cover

TECHNICAL FEATURES

- IPX06 mobile push-button panel with spiral cable
- Up – down controls on control box
- Headrest included
- Folding seat to reduce the overall dimensions of the lift
- Retractable footrest
- Adjustable armrests
- 2-point ventral safety belt
- Emergency stop button
- Removable battery for charging
- External battery charger
- Average autonomy: 50 working cycles
- Galvanizing and 180°C powder coating treatment
- Stainless steel frame for in-water parts
- Battery charge level indicator
